SUMMARY

Full-Stack Software Engineer experienced with Java, Spring Boot, JavaScript, React and Angular. I enjoy building end-to-end features, from backend services to clean and responsive UIs. Strong interest in scalable architectures, microservices, and modern frontend development. Motivated to keep learning, collaborate with teams, and take ownership of technical challenges.

WORK EXPERIENCE

Junior Software Engineer, Minsait Indra

- Backend development of microservices using Java & Spring Boot, applying clean and maintainable code practices.
- Creation and maintenance of business logic in PL/SQL and integration with frontend-facing APIs.
- Collaboration with frontend teams to ensure correct API consumption and feature alignment.
- Participation in UI validations and internal tooling improvements using React (si quieres puedo detallarlo más).
- Troubleshooting incidents using logs and behavior analysis in production environments.
- Agile teamwork with QA & DevOps performing code reviews and controlled deployments.

Jun 2024 - Now

EDUCATION

Software Engineer Degree

Focus areas: Backend development, software architecture, databases, microservices, testing.

2020-2024

TECHNICAL SKILLS

- **Frontend:** React, React Native, Angular, Next.js, JavaScript, HTML, CSS, Tailwind
- **Backend:** Java, Spring Boot, Node.js, Express, Python, REST APIs, Microservices
- **Databases:** PL/SQL, MySQL, PostgreSQL, MongoDB, Kafka
- **DevOps:** Git, Docker, CI/CD, Linux, AWS
- **Other:** API design, Clean Code, Concurrency basics, JUnit
- **Languages:** Spanish (native), English (B2)
- **Projects:** [Portfolio](#)
